Pre-made Ant Capping Corners NOW that's clever.

Finlayson's are pleased to introduce Ezicorner, an exciting new product which makes on site ant capping faster and cheaper with a revolutionary pre-made cornering system.

The manufacturers claim Ezicorner can reduce labour costs by 80 percent as it takes a maximum of two minutes to install, and can therefore save carpenters up to 30 minutes per corner.

Made from galvanised steel, Ezicorner is suitable for use on either slab on ground or with combination of slabs and steel columns, as the corners are welded.

The Ezicorner pre-made corners offer a much cleaner and more precise finish with perfectly formed right angle corners and structural welded joints, which not only reduce penetration by ants but also provides extra strength where corners are cut for steel columns.

The Enviroseal™ ProctorWrap™ range of products is compatible with all timber and metal Lightweight Clad systems, including; James Hardie™, Weathertex and Cemintel® and Hebel® products.

- **Minimises Risk of Condensation Related Rectification Work** – Enviroseal is vapour permeable and allows moisture to escape the wall and help reduce risk of condensation
- **Improves Speed of Construction** – Allow tradies to access the site immediately after wrapping and prevent delays caused by bad weather
- **Improves Air Tightness and Energy Efficiency** – Wrapping reduces draughts and minimises energy consumption
- **A Tough Weather Barrier** – Protects the building frame from decay by reducing the entry of wind driven rain and dust.

CONSIDERATION	RECOMMENDED FOR:
Wall Construction	Brick Veneer and all Lightweight Clad
Insulation Type	Highly recommended when using R2.0 batts or above
External Environment	Warm to Cold

Note: Bradford Enviroseal is not suitable for tropical climates. Tropical climates require a Vapour Barrier 'High' and the use of Bradford Thermoseal Wall Wrap is recommended.

Enviroseal™ ProctorWrap™ is suitable for use behind both brick veneer and lightweight clad walls. Enviroseal™ ProctorWrap™ is classified as a water barrier and is a vapour permeable wall wrap in accordance with AS/NZS 4200.1.
